

## Position Profile

*Internet Engineer*

Revenew Systems, LLC

1540 E. Dundee Rd.  
Suite 245  
Palatine, IL 60074

OFFICE 847 359 9250  
FAX 847 359 9255

## Internet Engineer Position Overview

This is an outstanding opportunity for a sharp engineer to impact the growth of a start-up company in the increasingly important marketing services sector. The **Internet engineer** is responsible for the implementation of our web-based, hosted marketing solution for all customer installations. This position will work closely with an off-shore engineering team to perform release testing and coordinate customer deployments. Application testing and provisioning, web-site development, configuration management, customer support, and network administration are key roles performed by this position. This is a hands-on position, with full responsibility and accountability for delivery of successful customer platforms.

Your ability and desire to perform and execute in start-up mode is a must.

## Principal Responsibilities

- Manage and administer customer installations
- Application testing and provisioning of client platforms
- Design, develop, test and maintain client websites
- Network administrative support (including monitoring of hosting center)
- Tier 1-2 Customer support

## Experience and Qualifications

- 2-5 years of experience in internet application testing
- 2-5 years of experience in website design and administration
- Working knowledge of a variety of web page applications and formats
- Must be familiar with Windows-based hardware, software and network administration
- Familiarity and understanding of databases, SQL, and CRM's a plus
- Development experience with .net a plus
- Experience in software life cycle management and web based application development
- Self reliant/starter, problem solver, entrepreneurial spirit
- Excellent communication and writing skills
- Knowledge and desire to code if required
- Bachelors degree in computer science or computer engineering preferred

## About Renew Systems ([www.renewsystems.com](http://www.renewsystems.com))

Renew Systems is a start up company that provides a comprehensive, fully integrated, web-based solution that delivers the technology, services and best practices to drive sales growth through indirect channels of distribution. The solution helps our clients focus their channel on the highest potential prospects for their business, align their channel with the right messages and marketing programs, and measure the results of these activities, both in responses and sales results. We accomplish this by providing on line access to a custom database of targeted prospects, customizable marketing programs, and aligned electronic marketing, co/op and incentive programs. We provide expert services to our clients to help formulate their channel marketing strategy, as well as implementation services to make sure their marketing programs are successful.

Renew Systems headquarters is in Palatine, Illinois, near Chicago; with additional key staff in Atlanta and India.
